

Double Stem Extension Kits

Optional Accessory

Product No.: PK460

Price: \$20.00

Finish Choices:

DESCRIPTION

The Double Stem Extension kit is used when the hanging fixture uses two stems hanging down from the ceiling. The stems that are included with the fixture have an adjustment range of 15 to 27 inches. When you purchase one of these Extension kits, you can increase the length of the stems from 30 inches up to 138 inches.

How to order:

1. Determine the length of the stem you need
2. If the length is longer than 27 inches, select the option that will get you to the length you need.
3. Specify finish color when ordering.

Special Note:

If you are mounting to a vaulted ceiling, you may require a different style of canopy. See the Vaulted Ceiling Kit - Double Stem CK422.
