

Vaulted Ceiling Kit - Chain Billiard

Optional Accessory

Product No.: CK421

Price: \$50.00

DESCRIPTION

This Kit is need when you are hanging one of our Rocky Mountain Billiard Lights from a vaulted ceiling where the long side of the light is running perpendicular to the sloped ceiling. In other words, if the installation location will result in the chains having different lengths when the fixture is hung, then you will need this canopy kit because the light will be oriented perpendicular to the slope of the ceiling. In this situation, without this special canopy kit, the chains will not be able to attach to the light fixture because one chain will be shorter than the other.

If the island or billiard light runs the same direction as the sloped ceiling, you will not need this kit.
